

It's not just knowing what your IT budget is.  
It's knowing where your IT budget goes.

**M-PWR brings IT into focus.**

## Nicus has a better solution ... M-PWR

Next Generation IT Cost Accountability Solutions from Nicus:

It's where technology accounting is heading ... to see where your company's resources are going.

### IT Cost Visibility and Chargeback Solutions

M-PWR is designed for the most demanding enterprise showback and chargeback requirements to allow your company to track where resources are being invested and what kind of return is being realized.

Only M-PWR provides complex process modeling with over 100 built-in functions, open scripting and a dynamic data model. M-PWR enables automation of the most complex financial processes.

- Enterprise solution that supports chargeback for all IT services
- Enables all traditional IT cost allocation methodologies (Service Based Pricing, Measured Usage, Negotiated Flat Rate, Tiered Flat Rate, Direct Cost, High- and Low-level Allocation)
- Stand-alone IT financial management and chargeback application
- Tracking of IT finances from start to finish – a consolidated view of revenue, expense and budget data
- Developed to be maintained and operated by IT financial staff and their customers
- Web-based budget and forecast data collection into centralized database for analysis and reporting
- Powerful desktop and web-based reporting tools
- Open architecture allows interfaces to nearly all data collectors, reporting tools and corporate accounting systems
- Robust data-manipulation tools
- Interfaces to existing IT showback and performance repositories like CA-MICS, MXG, Tivoli, VMware, Microsoft VMM, Enterprise Storage Management products, time-tracking applications and many others
- Can replace or augment existing IT chargeback applications
- Interfaces can be used to consolidate data for centralized reporting and input to M-PWR cost models
