IT Financial Management & TBM Solutions

Designed to achieve true IT cost transparency and encourage informed decision making.

THE NICUS ITFM PLATFORM

Nicus consists of a powerful suite of ITFM applications. The data and analytics platform leverages proprietary modeling capabilities, powerful self-service analytics, and planning workflows to enable customers to make actionable, data-driven, strategic, and operational decisions. The platform automatically aggregates, cleanses, and establishes relationships across large sets of customer data from disparate sources and maps into a standard model.

POWERFUL REPORTING CAPABILITIES:

- Reporting & Charting
- Dashboards, Portals, Detail
- Level Reporting
- Web-based Report
- Authoring Tool
- Powerful Visualizations
- Report & Data Editing
- Drill-Down & Drill-Thru
- Role-Based Security
- Single-Sign-On (SSO) & Active Directory (AD) Integration Capabilities
- Dynamic Content
- Saved Filters
- Custom Views

Find out why our IT financial management solution is at work in some of the world's largest and most technologically-advanced organizations.
